**Custom Labeling**

## Within the complex world of network cabling, detailed identification cannot be underestimated.

---

Capital Electric's Custom Labeling Program extends a number of benefits:

### Organization

Through easy-to-read, color-coded labels - all created in-house to your specifications - project installations remain organized and manageable from Day 1.

### Efficiency

Imagine the savings - in both time and money - by having everything complete and available at the time of install! No more need for your employees to manually produce labels along the way.

### Compliance

The telecommunications industry is governed by the TIA/EIA-606-A Standard. Be prepared and accountable with custom labels that fulfill these strict guidelines.

### Productivity

Your technician's expertise is more profitable to infrastructure application. Let Capital Electric be the support staff that can free up that valuable time by creating a specialized, ready-made identification system.

### Professionalism

Every single piece of work your company completes should look its best. All labels are produced with this goal in mind - extending not only your corporate identity, but your credibility, as well.

Helping customers find better ways to succeed... just another way Capital Electric strives to be At Your Service.
